

seymourpawprint.com Markdown guide

Markdown is the usage of syntax to format your texts

- To start a new paragraph, hit your enter ↵ key and start a new line

General markdown that works wherever placed

- ****<content>**** to indicate **bold**.
****ill intent** = ill intent**
- **<content>** to indicate *italicization*.
**ill intent* = ill intent*
- [`<display message>`](`<url>`) to indicate a [link](#).
[click here!](www.google.com) = [click here!](#)

Markdown that works only when placed at the beginning of a new paragraph/line

- `#<content>` to indicate a **header**. Additional pound # signs will yield increasingly small headers, up to four ##### pound signs
`#ill intent` = **ill intent**
`##ill intent` = **ill intent**

and so on and so forth
- `*<content>` to indicate a • bulleted item
`*Reforms to the healthcare system` =
• Reforms to the healthcare system
- `||<content>` to indicate a quotation
`||Reforms to the healthcare system` =
| Reforms to the healthcare system

- ! [<alternate text describing image if it doesn't load>](<link to image>){<caption>} to indicate an image. Remember that there is a difference between the square [] brackets and curly {} brackets
[Picture of the White House](https://pbs.twimg.com/profile_images/1351938473142448133/JQT93Cjo_400x400.jpg){The White House has come under criticism recently for comments made about things} =

The White House has come under criticism recently for comments made about things

REMEMBER YOU MUST USE LICENSABLE IMAGES!!!!!!!!!!!!!!!!!!!!!! Do not commit copyright infringement

- \n to escape a markdown rule. Remember to use a backspace \ not a slash /
*\nReforms to the healthcare system = *Reforms to the healthcare system

Select **Preview Submission** to preview how your article will format with the markdown applied.
